About us

SPECIALIZED IN GLUTEN-FREE OATS AND TASTY PLANT PROTEINS

Raisio, established in 1939, is a traditional Finnish company specialized in healthy, responsibly produced food and ingredients.

We are and have been the forerunner in gluten-free oats for over 15 years and are also known for delicious fava bean-based plant proteins. During our long history, we have become the biggest oat producer in Finland.

Our Nordic climate brings out the best in oats and fava bean, our beloved main ingredients, which love bitterly

cold winters and draw all their energy from short, intense summers. Because of our harsh northern conditions, oats and fava beans used in our products do not need a lot of fertilizers or pesticides to grow.

Clean water, pure air and the midnight sun all contribute to the extraordinary quality of our ingredients.

Our passion is to innovate and create new products that make the impact of your choice. We lead the way to your customers' hearts by developing and serving delicious food with strong expertise and knowledge.

RESPONSIBILITY

Responsibility is part of our strategy and guides our daily work. We have been making sustainably produced, healthy, high quality and safe food for over eighty years, but we still believe in continuous improvement.

Our responsibility programme, the Good Food Plan, divides into five areas:

- » Healthy Food
- » Sustainable Food Chain
- » Environmentally Friendly Packaging
- » Food Professionals
- » Environment & Climate Action.

Our assortment at your disposal

Our plant-based assortment includes ingredients and services for Food industry and Food Service operators. Whether you are a bakery or a ready meal manufacturer, we got you covered!

We are happy to share our know-how and help you choose the best possible ingredients for your applications and offering!

PLANT PROTEINS (P. 4-5)

Our plant protein products consist of versatile Beanit® plant proteins which are the choice for food industry, food service and Horeca operators alike. The key ingredients are Finnish fava bean and oats, which are our prides.

GLUTEN-FREE OATS (P. 6-8)

We offer wide range of gluten-free oats for the needs of food industry and bakeries. Our oats are grown in Finland and are always sure to be gluten-free, safe and sustainable. We offer both conventional and organic varieties of oat groats, oat flakes and oat flours.

RAISIO FOOD SOLUTIONS

OAT BRAN CONCENTRATES (P. 9)

We offer high fiber Oat bran concentrates specifically developed for adding fiber, protein and nutrition into various food applications from bakery products to meat alternatives. Our Oat bran concentrates contain all the goodness of oats in a concentrated form. They are also rich in beta-glucan, which is an extremely healthy soluble fiber.

CONTRACT MANUFACTURING (P. 10)

Seize the opportunity to enter the high demand market of plant-based products easily. We offer contract manufacturing of plant-based drinks and oat flakes according to your recipe and as a private label.

Versatile plant proteins

Our plant protein range offers versatile solutions for serving easily approachable plant-based food. The high protein Beanit® products are a sustainable and easy way to make your vegan offering even better!

Fava bean - The New Old Food

The fava bean isn't exactly a new fad, as the beginning of its farming dates to prehistoric times. Here in Finland, people have been eating fava beans long before being introduced to the potato! For a long time, the fava bean was nearly forgotten, but its versatility and deliciousness in cooking have never gone away! Nowadays, use of the fava bean as foodstuff is rapidly increasing – thanks to you and a bit to us!

DRY TEXTURED PROTEINS

Healthy and versatile protein ingredients for food industry. Ideal in plant-based meat alternatives.

Beanit® Textured fava protein mince TFP60M

Produced from fava bean and pea proteins. It is full of protein (63%) and works as a healthy and sustainable ingredient for a variety of plant-based and meat alternative applications, such like burgers, balls, sauces and fillings. Brings meat-like, juicy and firm texture while enabling good flavours. Keeps its firm texture and mouthfeel well after hydration.

Gluten-free | Soy-free | High protein
Rich in fiber | NON-GMO

Package: 8 kg
Shelf-life: 12 months

Beanit® Textured Oat-plant protein mince TOP45M

Designed as a healthy ingredient for various plant-based food. It brings the good qualities of oats grown in Finnish fields and the protein of legumes to foods in a single product. It contains a high amount of fiber from oats, including healthy beta-glucan. A hydrated product brings great texture into meat-like applications such as nuggets, burgers, sauces and fillings.

Gluten-free | Soy-free | High protein
Rich in fiber | NON-GMO

Package: 8 kg
Shelf-life: 12 months

WET TEXTURED PRODUCTS

Easy, tasty, and ready-to-use meal components for Food Service.

Beanit® Fava Bean Chunks

Versatile and tasty plant protein in familiar form. Fava bean chunks are made of fava bean and pea proteins and are high in protein (>25%). Ideal in dishes such as pastas, woks, stews, tortillas, pitas and burgers. Deliciously crispy when pan-fried but are also ideal to be prepared in an oven.

Gluten-free | Soy-free | High protein | NON-GMO

Package: 2,5 kg x 4
Shelf-life: 8 months

Available flavours:
UNFLAVOURED
GARLIC & HERBS
SAVOURY LEMON
CHILI

Beanit® Fava Bean Mince

Versatile and tasty plant protein in minced form. The Fava bean mince is made of fava bean and pea proteins and is high in protein (>25%). Perfect in various dishes such as pizzas, salads, casseroles, pies, sauces and fillings. Ideal as a substitute for cooked minced meat.

Gluten-free | Soy-free | High protein | NON-GMO

Package: 2,5 kg x 4
Shelf-life: 8 months

Available flavours:
UNFLAVOURED
UMAMI
SAVOURY LEMON

Gluten-free oats

We offer a suitable oat ingredient for many applications, such as cereals, porridge, bakery products, snacks, cookies and oat dairy products. By adding the trendy oat-based goods to your assortment, you can answer to customers' needs of your customers and enhance their wellbeing with a gluten-free whole grain.

OAT GROATS

Steel cut groats

Wholegrain steel cut oat groats are whole kernels that have been cut into two or three pieces. Cutting reduces the cooking time. Oat groats gluten-free retain their shape even after cooking and have a nice chewy texture. Groats are perfect to add texture for stuffing and a healthy alternative for rice. Steel cut oats are also referred to as pinhead oatmeal or Irish oats.

Gluten-free | Rich in fiber | Also organic

Package: 20 kg / big bag

Shelf-life: 15 months

Oat kernel

Heat-treated dehulled oat kernels. Kernels are suitable for a wide range of cooking and needs of the food industry. Whole grains makes a good oven porridge, which has nice texture. Kernels can be used instead of rice as a healthy side dish.

Gluten-free | Rich in fiber | Also organic

Package: big bag

Shelf-life: 15 months

Traceability and safety

We collaborate with our local contract farmers and control our short and transparent supply chain to get you traceable and high-quality oats. The purest air and water, good varieties and skilled farmers yield the highest quality products.

OAT FLAKES

Rolled oats

Rolled oats are manufactured by processing and flattening oat kernels. Rolled oats hold their shape well during cooking and are ideal for granola bars, cookies, biscuits and other baked goods like muffins and cakes. Rolled oats are also known as old-fashioned oats or regular oats.

Gluten-free | Rich in fiber | Also organic

Package: 20 kg / big bag
Shelf-life: 15 months

Muesli oat flakes

Muesli oat flakes are manufactured by processing and flaking oat kernels. Muesli oat flakes are thicker than jumbo flakes which makes them good option for muesli and granola production.

Gluten-free | Rich in fiber | Also organic

Package: 20 kg / big bag
Shelf-life: 15 months

Steel cut oat flakes

Steel cut oat flakes are manufactured by processing and flaking steel cut oat groats. Steel cut oat flakes also called as small flakes or quick oats are suitable for porridge and all kinds of baking.

Gluten-free | Rich in fiber | Also organic

Package: 20 kg / big bag
Shelf-life: 15 months

Jumbo oat flakes

Jumbo oat flakes are manufactured by processing and flaking oat kernels. Great product for making thick and tasty porridge. Jumbo oat flakes have a slightly nutty taste profile. Ideal also for all kind of snack and porridge oats production.

Gluten-free | Rich in fiber | Also organic

Package: 20 kg / big bag
Shelf-life: 15 months

Instant oat flakes

Instant oat flakes are manufactured by processing and flaking steel cut oat groats. Instant oats can be used similar ways as other flakes. However, cooking time will be much less, and the final dish will not have as much texture.

Gluten-free | Rich in fiber | Also organic

Package: 20 kg / big bag
Shelf-life: 12 months

OAT FLOURS

Endosperm oat flour

Oat endosperm flour is produced from the inner parts of dehulled oats. Endosperm flour has less fiber than wholegrain flour and is suitable product for dairy-free milk & gluten-free production and for fine patisserie & bakery applications. It is easily dispersible because of low fiber content. Color is creamy and taste very neutral.

Gluten-free | Rich in fiber

Package: 20 kg / big bag

Shelf-life: 10 months

Wholegrain oat flour

Wholegrain oat flour is suitable for sweet and savory baking. It is ground from oat flakes. Wholegrain oat flour is healthy flour option. Flour can replace easily up to 20% of the existing flour of a recipe. It contains a lot of protein 14g/100g and fiber 11g/100g. Gf wholegrain oat flour is nutritional addition to any gluten-free baking.

Gluten-free | Rich in fiber

Package: 20 kg / big bag

Shelf-life: 10 months

Inside the Nordic oats

Oats are a cereal plant with a loose, branched cluster of florets. When ready to be harvested, oats turn into beautiful golden yellow color. Oats are one of the healthiest grains on earth.

After raw oats are dehulled, they have three parts in the edible grain: the bran, germ and endosperm. The bran contains vitamins, minerals and is high in soluble fiber. The core is called the germ which nourishes the seed and contains antioxidants, vitamins, and healthy fat. The endosperm, the largest part of the kernel, contains lots of starch and some protein.

High-fiber oat bran concentrates

Our oat bran concentrates are especially useful in all kinds of sweet and savory bakery products, but they can also be easily added to biscuits and snack bars, breakfast cereals, muesli and porridge, meat and meat alternative applications and sport nutrition.

Oat bran concentrates offer many benefits in regards of production processes. They have great water binding capacity, for example in bread and bakery products. They have high viscosity which results in good thickening

properties in many applications. They are also well suitable for extrusion processes, which broadens their use into various applications, such as meat alternatives.

Oat bran concentrate N10

Produced from dehulled oat groats by fine milling and air fractionation. Concentrate is packed with protein (20g/100g) and fiber (21g/100g), containing soluble fiber beta-glucan 10g/100g. Add concentrate to have a healthy boost to your products. Concentrate is versatile and can be used in many applications, thanks to its fine structure and neutral taste.

Rich in fiber | High protein

Package: 20 kg / big bag
Shelf-life: 12 months

Oat bran concentrate N15

Produced from dehulled oat groats by fine milling and air fractionation. Concentrate is packed with protein (21g/100g) and fiber (32g/100g), containing soluble fiber beta-glucan 15g/100g. Offers an easy way to increase the fiber content of your final product. Concentrate is versatile and can be used in many applications, thanks to its fine structure and neutral taste.

Gluten-free | Rich in fiber | High protein

Package: 20 kg / big bag
Shelf-life: 12 months

For your health

Oats have many health benefits. Oat's soluble fiber, beta-glucan, lowers cholesterol and keeps blood sugar levels stable. Oat fiber also keeps the stomach satisfied. Oat bran concentrate's high fiber and beta-glucan content makes it easier to achieve a high fiber content and can enable the use of official EU health claims.

Sustainable choice for private label and contract manufacturing

We offer contract manufacturing of plant-based drinks and oat flakes at our gluten-free factories. We have a substantial production capacity and are able to produce large amounts efficiently.

Over 15 years of experience

We have a long tradition of producing conventional oats and in addition over 15 years of experience from gluten-free oats. If you are interested in developing new oat products, Raisio offers decades of oat expertise for contract manufacturing and ready to use products.

Controlled production chain

We control the entire production chain, from the oat field to the production of end products. We only use Finnish oats, which come from Raisio's contract farmers located near our oat mill.
